## News From Your TOWN HALL

The City Commission saw the light and discarded an ordinance which forbids service men from voting on an absentee ballot in our municipal elections if outside the State of Florida, and passed a new ordinance which permits them this constitutional right, passing as an emergency measure.

Glory be, City Commissioners in its budget, figuring found it able to cut down the city mileage from 20 to 15 miles for the term of 1945-46.

Clerk Wallis returns on real estate property assessments, amount to \$3,261,045; less exemptions of \$314,800 for Homestead exemptions and \$316,470 on other exemptions, a net valuation of \$2,229,775 on real estate; \$405,900 on personal property or a total of \$2,635,675; which on a total 15 mile will raise \$39,551.2.

City budget for 1945-46 has been fixed at \$74,815,03, exclusive of Water Department which is operated on a separate account.

Elect day officers will be: Supervisor G. I. Evans, clerk; Mrs. Harold Reidel, Mrs. Helen Browning, Mrs. Nell Seulen and Mrs. Bee Fleming.

You have till five o'clock Saturday night to register, so don't overlook that important piece of business. Then you can vote on Tuesday's election.

## Nursery School On Open Monday

The Nursery School at the Ocoee Canoe will open officially Monday morning and will operate Monday thru Saturday from eight to six o'clock. Children from two years old to sixteen accepted and are eligible only if their mother is working.

Each child checked through the clinic before admission, who has taken inoculations for the various childhood diseases are requested to bring their papers.

## Heavy Rains Raise Level

Heavy rains in the w.r.e. areas leading into the Kissimmee river and later to Lake Okeechobee, have the lakes and streams bank full and it is showing up about one foot water level which is now reported up over the 14-foot stage.

## West Palm Beach Caterer Takes Over Local Restaurant

After a good deal of negotiation, Mr. and Mrs. John Gebel, owners of the former Tedder Gebel, Bayfield restaurant which adjoins the present Fress hotel on Main street, have sold the building and equipment to Bennett W. Bell of West Palm Beach, and same is booked to open to the public on the coming Sunday.

Mr. Bell, the new proprietor, for many years operated a large restaurant on the Dixie Highway in the Flamingo business district of West Palm Beach and for the past three years has been the manager of the Morrison Field cafeteria. As he has knowledge of food supply sources he is promising Belle Glade patrons the best the markets will afford in food.

Mr. Bell, L. W. Fellows, formerly of the Carlton Inn staff, the former the chef and the latter as hostess and cashier.

He plans to serve breakfast, noon lunch and evening dinners, with dinner meals on Sundays. Those who do not care for the better meals will be provided with a line of sandwiches, fruit, soups and table beverages. For those present no Monday meals will be served.

Mr. Bell is most pleased that he was able to purchase this location and is most glad to come to Belle Glade to join its group of business leaders. He promises that his service and meals will be fully up to the former standards of this well known eating place. Belle Glade citizens in turn will welcome the opening of the place as it was most needed here.

## No Fishing Law Enforcement Applied To Local Fishermen

Despite all the noise and predictions of Miami and West Palm Beach papers about the State Fish and Game Commission going to enforce new fishing regulation on lake Okeechobee so that commercial fishermen could obtain only a legal day's catch, no enforcement officers have as yet appeared on the lake. Commercial fishermen are still paying the trade and will continue to do so until the authorities spring their hand in making arrests. Then the offenders are ready to take legal steps to battle for what they term their rights.

**Award Paint Contract At The Brown Farm**

Earl Carter, who has been laid off for the last two years with operations and arbitrations, is looking so much improvement that he has again entering the painting and decorating business not as an actual worker, but as a contracting agent. This week he was given a contract for all the painting of the Beech-Nut packing station etc., at the former Brown Farm. The first order for materials will amount to \$1,000 which he and Mrs. Carl Cone contracted for with a Miami wholesale house during their business visit in that city last Friday.

You are aware that the Navy needs this firm on every vessel it runs as well as all merchant ships, for packing."

When the Japs quit, officials decided that this special war project would be abandoned but local farmers who are interested in a major crop for diversification do not wish to let the laboratory forgotten.

The two projects now underway in the Glades—the Sugar Company—Newport plant east of Canal Point and the Florida Ramie Products plant at the Prison Farm—represent a majority of the scientific knowledge of the practical methods of using the plant which grows naturally in the tropics.

After experiences in the U.S. and throughout the Islands and Central America, both outfits have chosen the Glades as bases for their ramie operations.

To miss a chance for further experimentation, which all insist is needed, does not make horse sense.

## 44 Entries In Labor Day Mixed Tournament

With forty four entries in the mixed half-bull foursome tournament a home-made celebration of Labor Day proved a success the Country Fair Agent, Mr. George B. Clegg, said. A budding child in the Agricultural program, he was a rosy checked, red haired fellow, quiet but with a full power of energy and he had not gone over his empire many times before he was soon given a chance to show what sticks him to the day.

Having much to learn, much to plan, much to carry out in his vast farm program, he attached himself to the Everglades Experiment Station and has always worked and been a good friend to those farm people and the community of two farms he made our present farm project the largest and one of the best in the state.

"Red" Mounts is known and respected everywhere in his country, especially in the Glades, where he has played an important role in the development of the area and who has given excellent service.

There is a move among high county officials and farmers to take away some of the heavy work of the present day from this ever willing and hard working young man, who has given his all to Gainesville where such an appointment would need to be promulgated and when and if such an assistant is named, the Glades farmers are hoping that it may be a man who comes and knows the layout of the Glades farming programs.

(Continued on page 6)

## Farmers Protest Abandonment Of Ramie Laboratory

### Government Proposes To Cut Off Funds For Experimentation

"Ramie offers to the Glades farmer a staple crop producing basic necessities and will go far towards a substantial diversification" said one farmer in a wire protesting the abandonment of the proposed ramie laboratory at the Experimental Station.

"We just know how to grow it most successfully," he continued, "nor do we know how to decorticate it successfully; there are not accepted methods of grading the fiber, nor is it known to what extent the 25 per cent protein meal by-product may be best utilized."

They know these things can be done beneficially and there are so many things about ramie we do not know that it seems penny wise to abandon this undertaking."

"You are aware that the Navy

needs this firm on every vessel

it runs as well as all merchant

ships, for packing."

When the Japs quit, officials

decided that this special war

project would be abandoned but

experimentation, which all insist

is needed, does not make horse

sense.

## Has Served County 20 Years As Its Farm Specialist

It does not seem possible that it has been around a score of years when a young college graduate came into Palm Beach county to take over the position of County Farm Agent, and after three years became a budding child in the Agricultural program. He was a rosy checked, red haired fellow, quiet but with a full power of energy and he had not gone over his empire many times before he was soon given a chance to show what sticks him to the day.

Having much to learn, much to plan, much to carry out in his vast farm program, he attached himself to the Everglades Experiment Station and has always worked and been a good friend to those farm people and the community of two farms he made our present farm project the largest and one of the best in the state.

"Red" Mounts is known and respected everywhere in his country, especially in the Glades, where he has played an important role in the development of the area and who has given excellent service.

There is a move among high

county officials and farmers

to take away some of the heavy

work of the present day from

this ever willing and hard

working young man, who has

given his all to Gainesville

where such an appointment

would need to be promulgated

and when and if such an assistant is named, the Glades farmers are hoping that it may be a man who comes and knows the layout of the Glades farming programs.

(Continued on page 6)

## Get Cut Off Right of Way

The St. Lucie County Commissioners have granted the Florida East Coast Railway right of way for the proposed new cut off branch from Okeechobee to Ft. Pierce. Farmers over in that county are pleased with this proposed improvement, as it passes through several of the best agricultural and vegetable production areas.

## The "Uncle" Habit

The war has made real men of millions of boys in the service.

But it has made sissies of a lot of folks at home.

It has taught them to expect big money for very little exertion.

This home front picnic has been made possible by the use of billions of dollars we didn't have. We borrowed 'em. And we can't borrow any more.

So, many of us will go to back to the fine healthful old habit of looking out for ourselves and holding our jobs by doing them little better than the next fellow. We gotta give up the "Uncle" habit.

## The People Should Know

The people should know how many billions of dollars are going to Europe & for they must foot the bill. Congress, since the succession of President Truman and at his request, has authorized the expenditure of \$13,000,000,000 for the rehabilitation of Europe. In addition we are obligated to contribute \$6,000,000,000 to the Bretton Woods international stabilization fund; nearly \$3,000,000,000 to the Export-Import Bank, and about \$5,000,000,000 for lend-lease during the coming year.

This makes a grand total of approximately \$27,000,000,000. None of this vast sum of money is to be spent in this country.

The American taxpayer is saddled with this debt, all of which is to be spent in Europe one way or another on the theory that we cannot prosper over here and create full employment unless Europe is stabilized over there on a prosperous recovery.

This New Deal reasoning sounds like the story of the country merchant who had no trade. He gave his neighbor \$5 so he could trade with him and thereby create business.

## A Bogus "Guarantee"

There is no basic division of opinion between modern industrial leaders and truly liberal political thinkers on the respective rights and obligations of capital and labor. They recognize capitalistic system must be preserved if this country is to go ahead as the great producer and pioneer of a higher civilization. They also recognize that the era when human labor could be treated as machinery, is dead. Industry cannot expect to hire a thousand or ten thousand "hands" and remain completely free of social responsibility. Those "hands" have families. So far as is humanly possible, their jobs must be stabilized. The best brains in industry are working on this problem.

In this new era labor can no longer be the hell-raising, capricious child. It too has responsibilities to capital. It cannot enforce impossible demands. It must turn in real work for real wages.

The War Labor Board, for the first time, has ordered that a "guaranteed" full employment clause be inserted in a union contract between a large chain store and its 300 salesmen. In other words, the employer in this unprecedented case is bound to furnish employment at specified wages to a specified number of people for 51 weeks—come what may.

While this order applies to only one retail organization having many stores, its implications are so far reaching that they affect the smallest as well as the largest business in the nation. Every forward-looking employer is in favor of providing continuous year-round employment to workers to the fullest extent possible. But employers will not agree that an agency of the Federal government should have the power to tell them they must "guarantee" work to so many men, regardless of conditions.

No order to "guarantee" full employment in retail trade will "guarantee" the buying habits of consumers. A store under such an order might well be forced to limit its employees rather than seek to give fullest possible employment at all times.

Full employment cannot be "guaranteed" by orders forcing employers to subsidize labor for which there is no work, thus increasing cost of production and distribution.

Economic security is not a creature of government decree.

## Distributing The Pork

At this time, when a number of states and cities are trying to get their noses in the Federal pork barrel via a tax-financed electric line to one of the tax-exempt Federal power plants, an editorial in the New Albany, Indiana, Tribune of June 4, is worth reading. It pulls some of the tinsel off the TVA experiment in the socialization of electric power which is costing the general taxpayers so much money says:

"True, the nation made the valley a Christmas present of \$750,000,000 . . . But the country is pretty sure to weary of subsidizing that vicinity one of these days, especially when it presses harder to remove industry from other regions to enjoy the 'blessings' Federal generosity has created."

The United States News revealed that as of April 1, 1945, Tennessee had \$400,000,000 of war contracts in process; Alabama had also \$400,000,000, and Mississippi \$100,000,000, a total of \$900,000,000. As of the same date, Indiana had \$3,200,000,000 of war con-

## THE POCKETBOOK OF KNOWLEDGE

WARTIME DEVELOPMENTS OF MANUFACTURES THAT CAN MEAN PEACE TIME BENEFITS AND JOBS TO AMERICANS ARE:

TRACTS IN PROCESS! More than three times as much as the three southern states combined.

"We have nothing against Tennessee, and hope it does well (on its own, if it can ever get back there) but we see no reason for the Middle West to be envied. Indiana and the rich industrial Ohio valley are doing all right, and without and fabulous gifts."

The Tribune should have added that political plans in the making would blanket the nation with TVAs, thus spreading "pork" as widely as possible. It remains to be seen whether the people can be bought into national socialism by this tax-squandering process.

LIONS HEAR FINE TALK ON SAFETY BY CLYDE TRAMMELL

Constable Ray Whitlock was program chairman at the Lions club Wednesdays and as he is in the safety and protection work it was appropriate that he have a speaker to talk on the subject of safety.

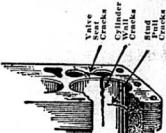

Antonie Cycle Trammell, of West Palm Beach, who is spearheading the Safety Department of the Chamber of Commerce and the American Legion.

He told of steps being taken to form a county wide safety committee which will be incorporated as a non-profit county wide units and which will organization. Mr. Trammell stated that now was a most important time for everyone to be careful and watchful, since the road traffic is wide open and ac-

cidents are bound to occur. He spoke of industrial and home accidents and claimed that 98 per cent of the accidents could be avoided if care was

#### OBSERVATIONS

Continued from page 1 up to the latter to give or deny support. The big issue in the present election is to get the vote out. Every elector could remember he has a specific and binding date for that day during the hours the polls are open and that is to get out and vote.

Corporal: "That new recruit used to be a clerk."

Sergeant: "How do you know?"

Corporal: "Every time he stands at ease, he tries to put his rifle behind his ear."

Heard of the old saying "like hunting for a needle in the haystack"? Well, that is the type of problem that many home hunters are now experiencing in the entire Glades area. It looks like the early birds have gobbed up the house worm. Influx of workers is coming some earlier than customary.

Some 60 members of the Masonic Lodge of Belle Glade, a village and town on August 29, 1944, when they heard Past District Deputy Grand Master J. D. Linderman of West Palm Beach, give the lecture of the Entered Apprentice degree to a quartet of candidates. In his later address he took as his theme, "Relieve the Troublesome," which proved to be a Masonic classic which deeply impressed all who heard it. Mr. Linderman is an honorary member of the local lodge.

What Japanese war lord remarked that Japan would be winner in peace in Washington? How humiliating it must now be to those Japanese that peace written in Tokyo bay at the dictation of the United States. No foreign enemy has ever flown its national emblem over Japan territory till Uncle Sam's boys turned the trick. And although the Japs' seized territory that Red White and Blue emblem will not come down, but will continue to float over conquered territories.

Mr. Crowley, the camp supervisor at Mayakaka City, was a former football coach and gave Coach Cook valuable assistance in the training of his boys. Crowley thinks highly of the team and especially so of Coach Cook's coaching methods. Crowley says he will gladly welcome the 1946 crowd back to camp when they come. Coach Cook has taken a "lease or option" for the camp for next year's training.

Superintendent Anderson, of the white Oscosla Migrant camp, says that if they had three times many units for rent as they possess they would be taken up speedily. Applications are coming in from all kinds, as if tents and trailer houses would again be demand on the outskirts of the camp.

While we people down in the Everglades of Florida are looking forward to the rains to bring our fathers water, we have some competition set in New Mexico, Arizona and Texas where scientists are working on the Yucca and desert cactus plants to secure a new source of supply for textile weaving fibres. They have gone a long way in their research, too, and soon will be able to announce definite success. They have found that some of the fibres have a textile strength comparatively equal to our ramie, but not so useful for the finer fabrics weavings. These scientists are great men and are only bringing out their results of wealth that country has in its undeveloped resources.

Some thirty years or more ago The National Tribune, the official organ of the GAR veterans of the North, set forth a program to urge the members of the organization to come to Florida to make permanent residence on the grounds that they could prolong their lives and find excellent living conditions. To aid this movement the Tribune planned and did set up such a colony over at St. Cloud, in Oscosla county,

which is now a modern and flourishing city of war veterans. Later a second colony was established at Zephyrhills, also successful; and later one at Taft near Orlando, and another at Lakeland. All in the northern portion of the state, but these latter did not expand or flourish.

As both St. Cloud and Zephyrhills are largely populated by retired service people and other pensioners of all classes, it is safe to predict that each will have an expanding population in the future.

With numbers of men who have learned about Florida, during training and camp period stays and who become to like our state and its advantages, many of our towns and cities will see a big influx of them coming in our midst to end their days. With numbers of men who have learned about Florida, during training and camp period stays and who become to like our state and its advantages, many of our towns and cities will see a big influx of them coming in our midst to end their days. With numbers of men who have learned about Florida, during training and camp period stays and who become to like our state and its advantages, many of our towns and cities will see a big influx of them coming in our midst to end their days.

By Ralph Kemp

"This next stickin' o' type is goin' to say last one thing—We got 35 million of Japs to beat."

#### BIBLE QUESTIONS

ANSWERED BY THE  
VOICE OF PROPHECY  
INTERNATIONAL BIBLE BROADCASTER

Question—Please send me the text that speaks of our never-dying soul.

Answer—There is no such text in the Bible. In James 5:20 we read: "Let him know, that he who converteth the sinner from the error of his way shall save a soul from death, and shall hide a multitude of sins." And Ezekiel 37:10 says, "The soul that sinneth, it shall die."

Q.—What is heaven?

A.—Theologians, as opposed to Israel (Nehemiah 5:13), who did not have the full knowledge of the true God. We read in Jeremiah 10:25: "of the heathen that know not me."

Q.—Why do some folks make such long prayers in meetings, and go over and over the same things?

A.—They are probably reciting old petitions in public or anywhere when Jesus said: "But when ye pray, use not vain repetitions, as the heathen do: for they think that they shall be heard for their much speaking." Matthew 6:7.

Q.—I have lost my first love in recent things. How can I get it again?

A.—Read Revelation 2:4 and do three things: (1) "Remember therefore how thou art fallen from thy high calling." (2) "Repent." Earnestly confess your backslidings and put them away. (3) "Do the first works." When God says, "Get up, get up in my vineyard," don't say, "Tomorrow."

Q.—How can I tell if I am converted?

A.—Your life will be changed. Wherever any man is in Christ, he is a new creature; old things are passed away; behold, all things are become new." 2 Corinthians 5:17. This is inseparably connected with genuine conversion—the Spirit, the truth, and the blood of Christ. John 6:63; John 14:17; 1 John 1:3.

Q.—Did the Bible writers claim that God spoke through them?

A.—They did. Luke 1:70: "He [God] spake by the mouth of His servant, David, in the book of Moses, 'Behold, I will send unto you a prophet like unto me, and His word was in my tongue.' Acts 3:22: "Whom the heaven received, giving him the times of restitution of all things, by which God hath spoken by the mouth of all His holy prophets since the world began."

Ed. Note: Address your questions to the BIBLE QUESTION COLUMN, The Voice of Prophecy, Box 1000, Lakeland, Florida. The editor reserves the right to shorten or edit questions of general interest. Questions of general interest will be answered in this column as space permits.

OWNER AND OPERATOR

### MR. FARMER

Seed potato shipments into Belle Glade for the coming season will be the heaviest in the history of the area.

The prospect for a good market is not so promising since the war has ended, so don't be careless with expensive seed. Treated and handled properly CERTIFIED seed potatoes will not decay because they must be almost totally free from disease in order to bear the blue tag certificate on each bag under the supervision of the officials of the State in which the potatoes are grown.

The common cause for decay in seed potatoes here is bacterial soft rot. This bacteria is present even on healthy potatoes and becomes active and destructive at high temperatures, lack of circulation of air and high humidity.

After the formaldehyde treatment do not pile the potatoes closely, spread them out, they do not necessarily have to be even under a shelter.

### The E. H. Borchardt Packing and Precooling Co.

We have hot formaldehyde treating facilities for your seed potatoes
